

Year 4 Home Learning page

Welcome to 2021, Happy New Year! It's really strange being here without so many of you and we're all missing you. How was your Christmas? Did Santa listen to your wishes and bring you brilliant gifts? I hope so; I think my biggest gift of all would be for us to be back together before much longer!

Now you're Year 4, I'd hope you are able to work independently for a longer period of time. You are showing super levels of perseverance when work is tricky in our classroom so if the work seems too hard then think back to all you've achieved so far! Don't give up.

Our new topic is "Cool Canada!" and I hope you can find out lots of amazing facts about this fantastic country.

W/C 11/01/2021

I have tried to give you a balance of work on Purple Mash as well as in the workbooks and online. If something is missing, please email me at year4@tynselparkesacademy.co.uk. The other option is to email me on Purple Mash but I'm not able to check it as often as I'd like because we're working so hard I won't have enough time.

Weekly timetable

The timetable is online for you to follow each day; you should be working for around 3 hours. I have set out the order we're doing things in school but if you want to do reading at the end of the day (for example) then that's fine.

English

Food! That's all you need to know! This week I'd like you to think about the favourite meal you ate over the holidays and describe it in mouth-watering detail. You have a week to plan and write it, plus a bit of editing time too.

Maths

Decimals are this half-term's focus. Start by looking at all the ways we use decimals in our everyday lives, making a poster that shows their different uses. I've shown you some in a PowerPoint to get you started.

Science

What do all living things have in common? This week, you're going to research it with the help of a brilliant song on YouTube and then make a poster to show what all living things do.

Canada

Start exploring where Canada is, who lives there and how BIG the country is! We'll build up our knowledge over the weeks. Our Art and DT links to the topic too and you're going to make a totem pole!

R.E.

We're going to look at three different religions this half-term, starting with Judaism. There are a couple of clips to watch which take you inside the synagogue and then a blank "Inside the synagogue" for you to try filling in.

Learning in Partnership

The new jigsaw is online so look for extra activities to do on there if you're feeling inspired. Feel free to get a grown-up to email us pictures of your home learning for us to share on the big screen.

Good luck with your learning; remember, if something seems hard, you just can't do it YET!

Mrs Skelton, Mrs Sowter, and Miss Sowter
