# Maths Calculation Policy

2023-2024

At Tynsel Parkes C.E. Primary Academy we are using the White Rose Education Maths documents as a tool for planning Maths lessons. Therefore we have adopted their calculation policy as we have found it to be the one which works for the needs of our children and suits the way in which we teach Maths. The use of the CPA approach (concrete, pictorial, abstract) underpins this calculation policy and is the basis for teaching calculation procedures at Tynsel Parkes. It is, however, a working document and will be revised and amended as necessary.

The policy goes through: **Addition and Subtraction (part one)** and **Multiplication and Division (part two)**. Each operation is broken down into key skills for the year group and shows recommended concrete resources, models and visual representations to support the teaching of the corresponding concepts. At Tynsel Parkes calculation procedures are taught according to this document so they can be seamlessly built upon year after year, as the children move through school.
